## Course Description

**Subject:** SUCCESS

**Grade:** 7 & 8

### Overview:

The goal of the *Success Program* is to give academic support to the children who are having difficulty achieving academic success in the regular classroom.

In addition to weekly tutoring sessions, students enrolled in the *Success Program* may receive the following services:

- Assessment tests administered by a *Success* tutor
- A written evaluation of the assessment tests
- Strategies for classroom instruction and accommodations, and/or modifications as needed
- Educational goals (by quarter)
- Quarterly progress reports based on quarterly educational goals
- Conference with parents, teacher, *Success* tutor, and Principal
- Written documentation of all meetings, assessments, and educational plans

### Primary Biblical Integration:

We believe that every child is created in the image of God. We believe God created every person for His glory and that each child is uniquely and wonderfully made. God has created some children who learn rapidly and easily while others might struggle more with learning and find school difficult.

### The Success Program designed for the Jr. High offers three levels of support:

**Level 1** - Weekly email communication from the *Success* tutor to the parents.

**Level 2** - Includes the weekly email as well as study hall support.

**Level 3** - Includes the weekly email, study hall support, plus academic and organizational support including assisting students with finishing work, studying for tests, strategies and techniques to help students memorize important facts and details, and monitoring reading and Accelerated Reading assignments.
