## Course Description

### Subject: Website Design

#### Overview:

This class is an elective class and meets two days a week each quarter. The skills and concepts covered in the class include website design and exposure to scan and edit options for digital pictures. The students are encouraged to use their creativity in designing a unique website of a subject that they are interested in. At the end of the quarter the students' websites will be uploaded to the school's student website to be viewed on the Internet.

#### Primary Biblical Integration: Galations 2:7

**"Instead, they saw that God had given me the responsibility of preaching the gospel to the Gentiles, just as he had given Peter the responsibility of preaching to the Jews.."**

**Matthew 28:19 "Therefore go and make disciples of all nations..."**

#### Unit Description:

- ✦ Website Design – The students will build a 5-page website about a subject of their choice. They will establish a theme, add borders, navigation buttons, descriptive text and dynamic effects such as marquee, photo gallery, and a hit counter.
  
- ✦ Photoshop Elements – The students will scan or bring pictures on some form of media to add to their website. The students will make color adjustments, crop, and color correct the picture images. They will also use various effects to enhance the picture images.
